

FLIP:PEN ONE

Probably all of us will know this situation: Working absolutely focused on a business paper for example, you just want to make a little note, but ... where the heck is my pen? Subsequently there will be lots of scrounging around and (even you can get hold of the little naughty tool) your concentration is somehow lost. This is where FlipPen ONE comes in! As a multi office tool it combines a ball pen, a highlighter and a super flat USB memory unit in one. Everything you need for a perfect day in school, university or in office. The integrated, silent ball bearing makes it so simple to switch between the various tools just by spinning FlipPen with your fingers. Thus you are optimizing the efficiency of your workflow playfully. But there is even benefit to it: Rotating FlipPen between your fingers provides a pleasing sensory experience. It enhances concentration and well-being especially when you are nervous or stressed! The variety of customization options make FlipPen ONE a viral, contemporary promotional product specially designed to increase your brand awareness.
